Note: We have improved the format for importing player salaries and contracts. This should make it easier to load CSV files and allow for contract values that are blank or contain spaces. If you rather continue using the legacy version, it is available [here](#).

Import Player Salaries

Enter or paste the player names and salary/contract info in the box below. The box is populated will all current players in the AFC. If you want to replace all of them, then clear the box first. Otherwise you can just update the displayed salary/contract info. Fields are separated with ; and are in order: **Player;Salary;Contract Year;Contract Info**. The Player can be entered as 'last_name, first_name' or as 'first_name last_name'. They may also be specified as MFL player ids. Team and position data is optional. Players not listed are left as is. But if the player is listed, blank fields will clear the info.
